

6) Medium.com article: Violence against women

LINK: <https://medium.com/@fakebusters/violence-against-women-28747feb1d8f>

The students analyzed the news “Turin, if a husband beats his wife sometimes, we cannot speak of abuse” which appeared on the website of a national newspaper.

Also in this case, the students used some of the strategies to check and unmask the fake news, but they were not able to understand, that the content of the news item was true. They had a lot of difficulties to read and analyze the text of the article (for example they did not understand that it is an article and it reports the motivations of a court sentence). Furthermore, the students were not able to distinguish between reliable websites, giving the same credits to a post on Facebook as well as to a national or local online newspaper.
